NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 consecutive months of data is available.

* Performance is for a partial period from June 1, 2018 to December 31, 2018.

Period - As of 12/31/2025	Gross Returns	Net Returns	MSCI ACWI (TR Net) Returns
1-Year	20.10%	18.80%	22.34%
3-Year	16.13%	14.89%	20.65%
5-Year	9.67%	8.55%	11.19%
Since-Inception	10.24%	9.21%	11.37%

*Since-inception performance is calculated for the period beginning June 1, 2018.

*Performance is annualized for periods greater than 1 year.

Index Advantage Global ETF Composite: *The Index Advantage Global strategy is constructed using ETF's that can measure Large, Mid, or Small capitalization companies; as well as individual asset styles of Growth, Blend or Value in US and NON-US equity markets. The strategy employs a 50% Strategic/50% Tactical asset allocation while maintaining individual cash, country, developed vs. emerging, sector and leverage constraints available upon request. The strategy is meant to be part of an overall comprehensive portfolio allocation, or extension of an existing allocation with an objective for exposure to equity markets available across the world. This strategy can also be considered a complete allocation to equity markets. The strategy may experience losses as it is subject to market risk, interest rate risk, and other economic risks that may influence the returns of this strategy. The Index Advantage Global ETF composite is compared against the MSCI ACWI (TR Net). The Index Advantage Global ETF composite has a minimum of \$10,000. The Index Advantage Global ETF composite was created in July 2024 and incepted on June 1, 2018.*

Vann Equity Management, LLC ("Vann Equity") is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940. The firm's full list of composite descriptions is available upon request.

Vann Equity claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Vann Equity has been independently verified for the periods June 1, 2018 through December 31, 2024. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Composite and benchmark performance is presented net of foreign withholding taxes on dividends, interest income, and capital gains. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. For fee-paying portfolios, net-of-fee returns are reduced by trading costs and each portfolio's actual investment management fee. Non-fee-paying accounts were reduced by a model fee. The model fee is the highest investment management fee that may be charged for this composite. The annual model management fee is applied on a monthly basis, by deducting 1/12th of the model fee from the monthly gross returns. Composite dispersion is measured by the asset-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee schedule for the composite is 1.25%.

GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein.

Index Advantage Small/Mid ETF Composite: *The Index Advantage Small/Mid ETF strategy focuses on capturing growth opportunities within the small and mid-cap segments of the U.S. equity market. By utilizing a diversified selection of ETFs, the strategy seeks to benefit from the agility and expansion potential of smaller companies while balancing risk through structured allocation. The investment approach combines market trend analysis and tactical positioning to optimize exposure across different sectors and styles, ensuring adaptability to changing market conditions. Designed as a growth-oriented component of a broader portfolio, this strategy aims to enhance long-term returns while managing volatility inherent to smaller-cap investments. The strategy is meant to be part of an overall comprehensive portfolio allocation, or extension of an existing allocation with an objective for exposure to the US equity market. The strategy may experience losses as it is subject to market risk, interest rate risk, and other economic risks that may influence the returns of this strategy. The Index Advantage Small/Mid ETF composite is compared against the Russell 2500. The Index Advantage Small/Mid ETF composite has a minimum of \$10,000. The Index Advantage Small/Mid ETF composite was created in July 2024 and incepted on February 1, 2021.*

REIT Equity Composite: At Vann Equity Management, REIT Equity refers to a diversified portfolio strategy focusing only on liquid traded companies on the NYSE, Nasdaq or other US stock exchanges within the REIT Sector. Real Estate Investment Trusts invest in real estate properties or real estate-related assets. These investments are typically focused on generating income through dividends from rental income or property sales while also aiming for capital appreciation. REIT Equities allows clients to invest in the real estate sector without directly owning properties, offering exposure to commercial or residential real estate markets. The strategy may experience losses as it is subject to market risk, interest rate risk, and other economic risks that may influence the returns of this strategy. The REIT Equity composite is compared against the MSCI US REIT Index (grs). The REIT Equity composite has a minimum of \$100,000. The REIT Equity composite was created in July 2024 and incepted on May 1, 2021.

Vann Equity Management, LLC ("Vann Equity") is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940. The firm's full list of composite descriptions is available upon request.

NA¹ - Composite dispersion is not presented for periods with five or fewer portfolios in the composite for the entire year.

NA² - The three-year annualized standard deviation is not presented for periods before 36 consecutive months of data is available.

* Performance is for a partial period from October 1, 2018 to December 31, 2018.

Period - As of 12/31/2025	Gross Returns	Net Returns	Custom Blended Benchmark Returns
1-Year	18.34%	17.10%	10.64%
3-Year	20.05%	18.85%	11.92%
5-Year	9.25%	8.21%	6.71%
Since-Inception	9.03%	8.08%	7.39%

*Since-inception performance is calculated for the period beginning October 1, 2018.

*Performance is annualized for periods greater than 1 year.

Structured Notes Composite: The Structured Note strategy is designed to optimize risk-adjusted returns through a combination of callable yield notes and callable growth notes. Our structured note composite targets tenors ranging from 12 months to five years, with the most widely used structure being a 3-year term. Notes within this strategy typically include a "no-call" period of between 3 and 12 months, providing a minimum holding window before the issuer can call the note early. This strategy combines both callable yield notes and callable growth notes with objectives of providing income and growth and looks to return an average of 12% return per year when annualized over periods 5 years or longer. The strategy may experience losses as it is subject to market risk, interest rate risk, and other economic risks that may influence the returns of this strategy. The Structured Notes composite is compared against the 40% S&P 500 (TR) & 30% Bloomberg 1-3 Month T-Bill & 30% Bloomberg US Agg Bond. The Structured Notes composite has a minimum of \$1,000. The Structured Notes composite was created in July 2024 and incepted on October 1, 2018.

Vann Equity Management, LLC ("Vann Equity") is a registered investment adviser with United States Securities and Exchange Commission in accordance with the Investment Advisers Act of 1940. The firm's full list of composite descriptions is available upon request.

Vann Equity claims compliance with the Global Investment Performance Standards (GIPS®) and has prepared and presented this report in compliance with the GIPS standards. Vann Equity has been independently verified for the periods June 1, 2018 through December 31, 2024. The verification report is available upon request.

A firm that claims compliance with the GIPS standards must establish policies and procedures for complying with all the applicable requirements of the GIPS standards. Verification provides assurance on whether the

firm's policies and procedures related to composite and pooled fund maintenance, as well as the calculation, presentation, and distribution of performance, have been designed in compliance with the GIPS standards and have been implemented on a firm-wide basis. Verification does not provide assurance on the accuracy of any specific performance report.

Results are based on fully discretionary accounts under management, including those accounts no longer with the firm. Past performance is not indicative of future results. Returns include the reinvestment of all income.

The currency used to express performance is USD. Gross-of-fee returns are reduced by trading costs. For fee-paying portfolios, net-of-fee returns are reduced by trading costs and each portfolio's actual investment management fee. Non-fee-paying accounts were reduced by a model fee. The model fee is the highest investment management fee that may be charged for this composite. The annual model management fee is applied on a monthly basis, by deducting 1/12th of the model fee from the monthly gross returns. Composite dispersion is measured by the asset-weighted standard deviation of annual gross returns of those portfolios included in the composite for the full year. The 3-year annualized standard deviation measures the variability of the composite gross returns and benchmark returns over the preceding 36-month period. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

The investment management fee schedule for the composite is 1.25%.

US Large Cap Growth Equity Composite: A pure growth portfolio of typically between 60-75 US large cap stocks with diversified exposure across industries. We seek to invest in competitively-advantaged businesses at various stages of their corporate life-cycle, leveraging innovation and change to drive rapid growth in earnings and cash flow. We look to identify stocks with the potential to deliver sustainable, earnings growth, capitalizing on both secular and cyclical growth. We are patient investors, aiming to invest in companies trading at attractive valuations relative to their long-term potential and taking advantage of cyclical opportunities to build positions in high conviction names. The strategy may experience losses as it is subject to market risk, interest rate risk, and other economic risks that may influence the returns of this strategy. The US Large Cap Growth Equity composite is compared against the Russell 1000 Growth (TR) and the S&P 500 (TR). The US Large Cap Growth Equity composite has a minimum of \$100,000. The US Large Cap Growth Equity composite was created in July 2024 and incepted on June 1, 2018.
